Adeel Ahmed

Senior Full-Stack Developer — Django & React

Seven years turning product ideas into fast, production-ready Django + React applications for small and mid-size businesses.

adeel@adeelahmed.dev • Lahore, PK · Remote-friendly • adeelahmed.dev • Taking on new projects January 2026

EXPERIENCE

Senior Full-Stack Developer 2021 – Present
Freelance / Contract Remote

- Delivered 14 production applications for SMEs ($5M–$80M revenue): logistics dashboards, B2B commerce, healthcare scheduling, and internal admin tools.
- End-to-end ownership — discovery, system design, database modeling, API and UI implementation, deployment, and 30-day post-launch support.
- Stack chosen per project: Django + React for data-heavy apps, Next.js for content-first sites, always with PostgreSQL and a sane CI pipeline.

Full-Stack Developer 2019 – 2021
Makeware Solutions Lahore, PK

- Built and maintained Django backends serving 8 concurrent client products, each with its own deploy cycle.
- Led migration from a monolithic jQuery frontend to React + Redux on the flagship field-service dispatch product (12k daily active users).
- Mentored two junior developers; owned code-review standards and the team's testing culture (pytest, 80% coverage minimum).

Python / Django Developer 2017 – 2019
Trillium Systems Islamabad, PK

- First engineering hire at a 3-person startup. Built the MVP in Django + vanilla JS; scaled it to 40k registered users.
- Shipped the Stripe billing integration, the admin panel, and the public REST API used by mobile teams.

SELECTED PROJECTS

FleetOps — logistics dispatch dashboard · 2025

Real-time dispatch board for a 200+ vehicle freight carrier. Django REST + Channels backend, React front with a live Mapbox canvas and drag-to-assign loads.

Dispatch response time cut from 4 minutes average to under 30 seconds.

Django DRF Channels Redis React Mapbox

Vault — B2B wholesale ordering platform · 2024

Replaced phone/fax ordering for 800 restaurant accounts of a $40M distributor. Account-tiered pricing, stock-hold logic, approval workflows, Stripe invoicing.

62% of orders self-served within 90 days; error rate down to 0.3%.

Django · Celery · React · Stripe · Tailwind

Pulse — patient intake & scheduling · 2023

Multi-clinic intake portal with role-based access, drag-and-drop scheduling calendar, conditional intake forms and insurance eligibility checks.

Front-desk phone volume down 45%; check-in time from 11 to 4 minutes.

Django · React · FullCalendar · Docker

SKILLS

Django / DRF		React / Next.js	
Python		PostgreSQL	
TypeScript		Tailwind CSS	
Node.js / Express		Docker / CI-CD
